Professional profile

Web developer with experience in quality assurance and IT support. Open to freelance project discussions involving responsive websites, content systems, software testing, and technical troubleshooting.

Experience

IOL Inc. - IT Support Specialist / QA Engineer
October 2020 - present

Manual testing and user acceptance testing against technical specifications. Enterprise software troubleshooting, translation of client feedback into requirements, and preparation of bug reports, test logs, and user documentation.

Selected project contributions

BaxterIP - Developer / IT Support
Managed Sanity.io content architecture and deployment; resolved functional bugs affecting cross-browser compatibility and consistent rendering.

CyberMeds - QA Engineer / IT Support
Functional and regression testing of an e-commerce application, including data integrity, transaction flows, and checkout usability.

ZIGMAFY / Advanced Robust Cooperative System - QA Engineer / IT Support
Platform testing, system validation, stakeholder feedback, technical documentation, and user training.

IRIS-BOT - QA Tester
Tested n8n and Telegram API document-retrieval workflows, response accuracy, user-command edge cases, and workflow failures.

Technical toolkit

Next.js, React, TypeScript, HTML & CSS, GSAP, Sanity.io, manual testing, regression testing, UAT, n8n workflow testing, Telegram API, and technical documentation. Portfolio implementation includes metadata, sitemaps, and structured data.

Education

Bachelor of Science in Computer Engineering
Lorma Colleges - August 2020
